### **DETAILED ACTION**

1. Claims 1-23 are allowed.
2. The following is an examiner's statement of reasons for allowance: Geschke (US Pat. 5,661,651) discloses a wireless vehicle monitoring system which detects the tire pressure of each wheel, transmits a different frequency for each wheel to identify which will be transmitting a signal. Each wheel has different characteristics and frequency responses. However, Geschke nor any of the prior art of record disclose in their entirety the claimed tire monitoring transmitter, at respective wheels of the vehicle that sense vehicle data and transmit tire data at one or more transmission frequencies chosen to be within a "previously identified" passband of frequencies of the tire. The "previously identified" passband is defined by the physical construction and elements used in the construction of the tire and the bandpass and attenuated frequencies are determined based on the tire's inherent reaction to electromagnetic energy imparted on the tire.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
